

Reverse handle pulling system "Confort" with closed hooks

This ratchet set consists of a **tensioning device with a sewn band with a closed hook end** and another **band section with a closed hook end**. This item is essential to immobilize any type of freight that is transported by land, air or sea.

In addition, this item differs from standard ratchet sets in that the force on the ratchet wrench is exerted in opposite direction and the length of the ratchet, **the tooth system and the tensioning direction allow for the lashing to be carried out with a lesser force.**

MATERIAL:	100% Polyester band Steel ratchet and hook PVC ergonomic part
FINISH:	Zinc plated metal parts Black ergonomic part
